In May MC, Deng JC, Albores J, Zeidler M, Harper RM, Avidan AY. Hypocretin deficiency associated with narcolepsy type 1 and central hypoventilation syndrome in neurosarcoidosis of the hypothalamus. *J Clin Sleep Med* 2015;11(9):1063–1065 published in the September 15, 2015 issue of *Journal of Clinical Sleep Medicine* there was an error in the second sentence of the discussion section. The corrected sentence is:

While the majority of patients with narcolepsy type 1 are HLA-DQB1*0602 positive, with its mechanism appearing to be related to decreased numbers of hypocretin secreting cells in the medial hypothalamus,⁴ low CSF hypocretin in patients who are negative for the HLA-DQB1*0602 allele, as in this case, are presumed to have a secondary and neurologically-mediated mechanism as a disease phenotype.⁴

The authors regret this error.
