## Acknowledgements to Reviewers

The success of a scientific journal depends on the quality review of manuscripts in a timely fashion. Each manuscript submitted to *Sleep Medicine* is reviewed by two, and sometimes three reviewers. The members of our Editorial Board review most papers, but many are also sent to ad hoc reviewers. I am most grateful to all those who have provided excellent, thorough and detailed reviews which have helped the authors to enhance the quality of their papers considerably.

The journal has been the ultimate beneficiary of these thoughtful reviews from so many distinguished sleep scientists and clinicians.

Listed below, with gratitude, are the names of the reviewers for the past year:
